

UNIVERGE SV9100 in InUC

NEC's Unified Communications Application

A good communication platform can be the backbone of your surgery. NEC's Unified Communications Application ensures that all incoming and outgoing calls reach the right people meaning patient frustrations are met with a calm intuitive response.

Smart Communications for SMBs

The SV9100 platform is a new system, with new handsets and new applications to empower your workforce. Built on the back of the award winning SV8100 technology, the SV9100 provides double the system capacity, yet cost effective from 10 to over 800 users.

The UNIVERGE SV9100 offers:

- Proprietary server with stackable chassis architecture
- Distinct, scalable, IP Unified Communications enabled solution
- Simplified user licensing structure
- Comprehensive suite of Unified Communications & Contact Center solutions
- Broad range of mobility applications and devices
- Vertical market-specific solution integrations
- Wide-range of end-points
- Single point configuration and management
- Multi-Line SIP client, multi-carrier support

Make a Smart Investment

The SV9100 comes with an unprecedented warranty and future-proof technology that meets the demands of your multi-generational employees. Recognized as having the highest level of customer satisfaction among Unified Communications vendors, NEC also brings you an incredibly smart investment. Industry experts recognize our Unified Communications platforms as having one of the lowest total costs of ownership on the market.

Work with Smart IT

Communications services interruption means downtime for your business, customers, and loss of revenue. That's why NEC's SV9100 is one of the easiest to configure Unified-Communications-capable systems on the market. The SV9100 easily integrates with existing IT technology as a fully interoperable IP or digital system. The user-friendly management interface streamlines system administration, giving IT Voice, Unified Communications and Voicemail from one central location.

Real Time Communications

Smart Collaboration

What is InUC?

The SV9100's InUC (Real-Time Communications) provides highly cost-effective video and collaboration working seamlessly within your IT environment. SV9100 users are able to quickly set-up audio and video connections between two or more PCs or devices from anywhere with an internet and VPN or LAN connection.

As well as video and audio conferencing functionality, PC users can work collectively with screen share and shared documents. It's also ideal for live software demos and presentation slideshows. Collaborating isn't just about sharing ideas, but also learning more about each other and making meaningful connections within a digital work place.

Key Features:

- > **Four Free Video Conferencing Channels included**
- > **Highly cost-effective solution**
- > **Uses secure connectivity**
- > **Includes Presence feature**
- > **Video conferencing, document & screen sharing or up to 32 (4x8) SV9100 users**
- > **Works via Google Chrome or Internet Explorer 11 on a PC or Android device**

InUC - Unified Communications Application

Competitive businesses come in all sizes but usually have one thing in common: great teamwork. And in the age of increasingly disparate working locations for employees, communications play a crucial part. Collaborating with colleagues doesn't always mean being in the same room together in the same time zone. In today's working environment, employees are spread across different locations. One of the best ways to collaborate remotely with colleagues is video conferencing.

Manage increasing patient demands with **InUC** in your surgery **NEC**

Get the most out of your workforce with the SV9100 from NEC. It's designed for real people and real business and gets your team working together from day one.

Empower your workforce with Smart Communications

"Our lines and system have been upgraded successfully and I'd like to thank Adam, and Peach in general for the great service."
